

OutputProvider::disableOutputs

MainModuleV1_0::enableOutputs

OutputProvider::enableOutputs

```
graph LR; A[OutputProvider::disableOutputs] --> C[OutputProvider::enableOutputs]; B[MainModuleV1_0::enableOutputs] --> C;
```

The diagram illustrates a flow or dependency. On the left, there are two rectangular boxes. The top box contains the text 'OutputProvider::disableOutputs' and the bottom box contains 'MainModuleV1_0::enableOutputs'. On the right, there is a gray rectangular box containing the text 'OutputProvider::enableOutputs'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'disableOutputs' and 'enableOutputs' from the left modules are inputs or dependencies for the 'enableOutputs' operation in the 'OutputProvider'.
